PROJECTS

Online Maid Services - Academic Project

- A convenient online platform for hiring maid services from the comfort of your own home.
- A simple sign-up and login procedure makes it simple to access the housekeeping services.
- The flexible scheduling option allows you to choose a time frame that suits your needs.
- ASP.NET, MySQL, and C# are utilized in the project's development.

Online Food Ordering System - site

- A user-friendly website that allows home delivery of meals.
- Integrated with email verification to verify new user identities.
- The ability to cancel orders prior to receiving confirmation from the website.
- Python, Django Framework, Bootstrap, and SQLite are used in the construction of this website.

ACHIEVEMENTS

Python: Gold Level, Problem Solving: Gold Level - HackerRank
